1. Project Introduction

MemeVerse Infinity is an innovative decentralized autonomous organization (DAO) based on the Alephium blockchain. It integrates NFTs, Play-to-Earn (P2E) mechanisms, and various interactive elements, aiming to provide a rich and diverse experience for players and community members. By purchasing MVT tokens, users can:

- Participate in various games and activities
- Engage in community governance by proposing and voting on project proposals
- Mint and upgrade unique NFTs
- Earn rewards through multiple channels

MemeVerse Infinity is committed to building a community-driven ecosystem where all decisions and future development directions are

collectively discussed and determined by community members. The core values of the project lie in decentralization, openness, and community-driven growth.

2. Token Economics

2.1 MVT (MemeVerse Token)

MVT is the native token of MemeVerse Infinity, featuring extensive ecosystem functionalities, including but not limited to:

- Required for participation in games and activities
- Community governance voting
- Staking to earn rewards and discounts
- Creating Meme tokens

Token Distribution:

- **Token Sales (30% | 30,000,000 MVT):** Used for initial sales and project startup funds to promote early ecosystem development.
- **Liquidity Pool (20% | 20,000,000 MVT):** Supports liquidity on decentralized exchanges to ensure smooth token trading.

- **Reward Pool (20% | 20,000,000 MVT):** Used to incentivize active community members, game players, and stakers, driving ecosystem engagement.
- **Early Contributors (15% | 15,000,000 MVT):** Allocated to DAO members and developers involved in the early stages of the project to reward their contributions. To align with the project's long-term development, these tokens will be gradually released through a linear unlocking method over one and a half years (78 weeks).
- **Marketing and Partnerships (10% | 10,000,000 MVT):** Used for marketing promotion and establishing strategic partnerships, listing on secondary exchanges, and expanding the project's influence.
- **Treasury (5% | 5,000,000 MVT):** Reserved as backup funds to support the project's long-term development and respond to potential market changes, potentially used for cross-chain bridges.

3. MemeFun Features

MemeFun is a significant application within the MemeVerse Infinity ecosystem. It is an innovative fair launch platform designed to provide community members with more convenient ways to create and trade.

3.1 Platform Features

- **Low Entry Barrier:** Users can create their own tokens with just 2,000 MVT.
- **Permanent LP Lock:** All liquidity pool (LP) tokens of newly created tokens are permanently locked, ensuring investor security.
- **Immediate Trading:** Newly created tokens can be directly traded on decentralized exchanges, facilitating trading and promotion.
- **Community Support:** Provides promotional channels and technical support for new projects, helping them grow.

3.2 Airdrop Rewards

- **MVT Holder Benefits:** All projects created on MemeFun will allocate 3% of the total supply as airdrop rewards, distributed to stakers based on their MVT staking proportion.
- **Incentive Mechanism:** This design encourages more people to stake MVT, supporting the development of the ecosystem.

3.3 Creator Rewards

- **Token Rewards:** Token creators will receive 5% of their project's total supply as a reward.

- **Encouraging Innovation:** Incentivizes community members to actively participate and create more interesting and valuable tokens.

4. Game System

4.1 FomoGame

FomoGame is one of the core games of MemeVerse Infinity, inspired by Fomo3D but with innovative mechanics.

Game Rules:

- **Purchase Key:** Players participate in the game by purchasing Keys.
- **Countdown Mechanism:** Each Key purchase extends the countdown, preventing the game from ending prematurely.
- **Prize Pool Distribution:** When the countdown reaches zero, the last player to purchase a Key receives the majority of the prize pool.
- **Fair and Transparent:** Prize pool distribution is executed automatically by smart contracts, with all transactions and rules recorded on the blockchain to ensure fairness.

4.2 More Games

4.2.1 GuessPrice

GuessPrice is a prediction game based on cryptocurrency market trends.

Game Rules:

- **Price Prediction:** Players predict whether the price of a specified cryptocurrency will rise or fall within a specific time frame.
- **Result Determination:** The system determines the outcome based on actual market data.
- **Reward Distribution:** Players who make correct predictions receive rewards proportional to their bets.

4.2.2 NFT Battle Game

The NFT Battle Game combines the collectible value of NFTs with gameplay.

Game Rules:

- **Character Battles:** Players use their owned NFT characters to battle, with each NFT having unique attributes and skills.

- **Game Modes:** Battles can be turn-based or real-time, with winners receiving rewards.

5. MemeBot Features

MemeBot is a multifunctional intelligent assistant within the MemeVerse Infinity ecosystem, designed to enhance user experience.

5.1 FomoGame Assistant

- **Real-time Notifications:** Provides the latest updates on FomoGame, including countdowns and prize pool amounts.
- **Quick Operations:** Through MemeBot, players can quickly purchase Keys, view personal earnings, and more.
- **Strategy Suggestions:** Based on data analysis, offers game strategy recommendations to players.

5.2 Token Trading Assistant

- **Market Data Queries:** Real-time access to token prices, price changes, and other market information.

- **Quick Trading:** Supports one-click buying and selling, simplifying the trading process.

6. MVT Staking and ALPH Reward Mechanism

6.1 Staking MVT for Discounts

- **Key Discounts:** By staking a certain amount of MVT, players can enjoy discounts when purchasing Keys in FomoGame. The larger the staking amount, the greater the discount.
- **Cost Reduction:** Through staking, players can reduce their game participation costs and achieve higher profit potential.

6.2 Dynamic ALPH Rewards

- **Reward Mechanism:** Players who stake MVT receive dynamic ALPH token rewards based on in-game activities and ecosystem engagement.
- **Incentivizing Participation:** The reward mechanism encourages players to actively engage in games and community activities, enhancing overall ecosystem activity.

7. Community Governance and Future Outlook

7.1 Community Governance

- **Proposal Mechanism:** Community members can propose project improvements, feature additions, and other proposals, with all MVT holders participating in voting.
- **Democratic Decision-Making:** Major project decisions require community voting approval.
- **Collaborative Development:** Early contributors work closely with community members to provide technical support and resources, jointly advancing the project's development.
- **Working Group System:** Establishes various working groups (e.g., technical, marketing, operations) composed of volunteers to promote orderly project development.

7.2 Future Outlook

- **Ecosystem Expansion:** Based on community proposals, explore cross-chain integrations, DeFi functionalities, more game types, and enrich the ecosystem.
- **Global Promotion:** Expand MemeVerse Infinity's influence globally to attract more users and developers.

- **Education and Training:** Conduct blockchain and cryptocurrency-related educational activities to enhance community members' knowledge and skills.

8. Ecosystem Co-construction Plan

MemeVerse Infinity is dedicated to building and developing an open, innovative, and decentralized ecosystem together with the community. To this end, we have launched the Ecosystem Co-construction Plan, inviting more developers, project teams, creators, and community members to participate, promoting the expansion and diversification of the ecosystem.

Core Components of the Co-construction Plan:

- **Technical Support:** Provide development tools, documentation, smart contract templates, and other resources to help developers quickly integrate into the MemeVerse Infinity ecosystem.
- **Funding Support:** Provide seed funding and token support for outstanding projects to help them launch and grow.
- **Community Incentives:** Encourage community members to participate in ecosystem co-construction through code contributions, content

creation, community management, etc., with contributors earning MVT rewards.

- **Partnership Program:** Invite external projects and partners to participate, jointly exploring cross-chain collaborations, DeFi integrations, and other innovative directions.
- **Education and Training:** Offer training on blockchain technology, development tools, and DAO governance to enhance community members' knowledge and skills, supporting the long-term development of the ecosystem.

Through this co-construction plan, MemeVerse Infinity aims to build a vibrant and innovative ecosystem that attracts more developers and users, jointly promoting a decentralized future.

9. Disclaimer

Decentralized Autonomous Organization (DAO)

- **Community-Driven:** MemeVerse Infinity and its related applications (such as MemeFun) are decentralized autonomous organizations governed by global community members.

- **No Central Entity:** The project has no central controlling entity or company; all decisions and developments are determined by community consensus.

Risk Warning

Participating in cryptocurrency and blockchain projects carries inherent risks, including but not limited to:

- **Market Risk:** Cryptocurrency markets are highly volatile, and token values may experience significant fluctuations.
- **Technical Risk:** There may be smart contract vulnerabilities, hacking attacks, network disruptions, and other technical risks.
- **Regulatory Risk:** Regulatory policies for cryptocurrencies may change in different countries, affecting project operations and token legality.

You should fully understand these risks and participate at your own risk.

Legal and Regulatory Compliance

- **Differences in National Laws and Regulations:** The legal status and regulatory requirements for cryptocurrencies and blockchain technology vary across different countries and regions.
- **Your Responsibility:** Before participating in the project or purchasing any tokens, you are responsible for understanding and complying with the laws, regulations, and tax obligations of your jurisdiction.
- **Professional Advice:** If you are unsure about the legality of your participation or the potential legal implications, it is recommended that you consult qualified legal, financial, or tax professionals before participating.

Limitation of Liability

To the fullest extent permitted by applicable law, participants, contributors, and developers of MemeVerse Infinity are not liable for any losses or damages resulting from participation in the project or use of tokens.

No Tax or Legal Advice

MemeVerse Infinity does not provide any form of tax, legal, or financial advice. You are responsible for the tax obligations and legal liabilities

involved in participating in the project and purchasing tokens and should consult qualified professionals.

Final Statement

By participating in the MemeVerse Infinity project and its related applications (including but not limited to MemeFun), you acknowledge that you have read, understood, and agree to all the terms and conditions of this disclaimer. You agree to bear all risks and responsibilities associated with participating in the project.

Community Participation

- **Join Us:** You can communicate with global community members through forums, Telegram groups, Discord servers, and other channels.
- **Contribute:** We welcome everyone interested in blockchain and cryptocurrencies to join us and help build the future of MemeVerse Infinity.

Thank you for your support! The growth of MemeVerse Infinity relies on the participation and contributions of every community member. Let's

work together to create a vibrant, innovative, and enjoyable decentralized world!
